

We recently introduced two new blogs: Pumping World News and our corporate SRS Crisafulli News in addition to our original blog the Dredging World News.

This means you now have an option to subscribe to the news and updates that best suit you, or if you like, subscribe to all three. Below are some of our recent posts, in case you missed them.

[Dredging the Back Nine: Storm Water and Water Treatment Ponds](#)

SRS Crisafulli's FLUMP Dredge was in the news this spring for its role in meeting the opening day schedule at a unique Wyoming golf course. [Read more](#)

[Ask a FLUMP Expert. Seven ways to Secure your Traverse System](#)

The propulsion and traverse systems are critically important to the operation of an unmanned, cabled dredge. The FLUMP, SRS Crisafulli's unmanned dredge, propels itself along a traverse cable connected to lateral cables at opposite sides of the lagoon, configured at 90 degrees to the traverse cable. [Read more...](#)
