For more than forty years, SRS Crisafulli has helped you meet your most difficult pumping and dredging challenges. And, you can count on SRS Crisafulli in the future. Our unique engineering and manufacturing capabilities enable us to customize our standard products to meet your needs precisely. To remove water, sludge, waste and worries, put an SRS Crisafulli pump, dredge, or power unit to work in your operation today.

Choose from a broad line of high-performance Crisafulli pumps and dredges which have earned a reputation as rugged, dependable, cost-effective material handling systems for a wide range of sludge, water and waste transfer applications.

SRS Crisafulli has been solving liquid waste problems for over 40 years. Problem-solving is our greatest strength.
Crisafulli’s portable PTO-powered “trailer pumps” require no priming, no suction hoses, or check valves. They are a convenient, efficient method of transferring liquids at high volumes – 4" to 24" discharge sizes – flows to 16,000 GPM.

**Models**
- PTO
- Diesel on Frame
- Electric on Frame

**Applications:**
- Flood control
- Irrigation ditches
- Canals
- Fisheries
- Wildlife refuges
- Waste lagoons
- Industrial wastes

**Vertical Pumps**
Designed for stationary applications. Low-head, high-volume pumps, available in discharge sizes from 2 to 24 inches. Custom-engineered to your pump site.

**Applications:**
- Chemical sumps
- Dairies
- Water treatment
- Manure tanks
- Tailing capture & re-use
- Stormwater management
- Irrigation
- Sewage disposal
- Drilling mud pits
- Fisheries

**SD-110**
Highly maneuverable, self-propelled, and light weight, this shallow draft dredge can operate to depths of 10 feet and in as little as 17 inches of water. Discharges up to 85 cubic yards of sludge per hour through either side-casting or floating discharge pipe.

**FLUMP**
A rugged, remote-controlled dredge to clean ponds or lagoons of biosolids, lime, alum sludges, residuals, or silt. The FLUMP is cable-guided, simple to operate and easy to transport.

**ROTOMITE SERIES**
Self-propelled, diesel hydraulic dredge series, capable of greater working depths. Fully enclosed cab enables high visibility – surrounded by a safe, unobstructed deck. Exceptionally productive, the Rotomite Series is offered in 4", 6", and 8" discharges.

**CRISAFULLI DREDGE APPLICATIONS:**
- Wastewater treatment
- Industrial wastes
- Biosolids & residuals
- Runoff ponds, basins & lagoons
- Manure lagoons
- Refinery & petrochemical wastes
- Processing plants
- Mines (management of tailings)
- Coal-fired power plants
- Potable water treatment
- Contract dredging
- Metal processing wastes
- Chemical sludges
- Marina & canal maintenance
- Stormwater retention ponds

SRS Crisafulli submersible electric pumps are designed to provide dependable, high-capacity water, trash, and slurry pumping.

**Applications:**
- Raw sewage
- Refinery wastes
- Storm and irrigation
- Flood control
- Mine dewatering
- Industrial effluents
- Construction projects

Crisafulli Dredges are equipped with the powerful and aggressive COBRA™ Cutterhead.

Crisafulli's portable PTO-powered “trailer pumps” require no priming, no suction hoses, or check valves. They are a convenient, efficient method of transferring liquids at high volumes – 4" to 24" discharge sizes – flows to 16,000 GPM.

**Submersible Hydraulic Pumps**

Heavy duty pumps ideal for waste handling or dewatering applications; from excavation sites to ditches, pits, and manholes.

**Applications:**
- Construction/contract pumping
- Mines, quarries
- Animal wastes
- Water transfer
- Irrigation
- Dewatering
- Emergency pumping
- Dredging
- Drilling mud pits
- Sewage bypass operations
- Trash applications

---

**Submersible Electric Pumps**

SRS Crisafulli submersible electric pumps are designed to provide dependable, high-capacity water, trash, and slurry pumping.

**Applications:**
- Raw sewage
- Storm sewers
- Flood control
- Industrial effluents
- Refinery wastes
- Irrigation
- Mine dewatering
- Construction projects

---

**Crisafulli Dredge Applications:**

- Wastewater treatment
- Industrial wastes
- Biosolids & residuals
- Runoff ponds, basins & lagoons

Pumps, Dredges, Power Units
CUSTOM OR STANDARD

For more than forty years, SRS Crisafulli has helped you meet your most difficult pumping and dredging challenges. And, you can count on SRS Crisafulli in the future. Our unique engineering and manufacturing capabilities enable us to customize our standard products to meet your needs precisely. To remove water, sludge, waste and worries, put an SRS Crisafulli pump, dredge, or power unit to work in your operation today.

Choose from a broad line of high-performance Crisafulli pumps and dredges which have earned a reputation as rugged, dependable, cost-effective material handling systems for a wide range of sludge, water, and waste transfer applications.

Applications:
- Floating pumps
- Maintenance platforms
- Machinery support
- Floating walkways
- Lagoon aeration

Power Units

Wherever you need hydraulic power, a Crisafulli trailer or skid-mounted power unit is the answer.
- Versatile power wherever / whenever you need it
- Designed and built for lasting service
- Rugged and reliable
- Available in diesel, electric, or gas models

Floating Pumps / Platforms

Custom, multi-purpose floating platforms for a variety of industrial and municipal applications.

Applications:
- Long distance slurry pumping
- Oil field mixing tanks
- Long distance irrigation pumping
- Chemical plants

Process / Booster Pumps

SRS Crisafulli process and booster pumps are designed to provide dependable pumping solutions for in-line applications. Electric, diesel, or gas powered, trailer or skid-mounted for portable performance anywhere.

Custom Products
